Idan Joshua Garay

Software Engineer

A self-driven software engineer enthusiast in an endeavor to become a principal software engineer. Committed to continuous learning to further polish my craft as a software engineer.

Work Experience (1 Company)

Koda Kollectiv
July, 2022 -
January 2023

Interned for 300 hours (OJT) doing static websites for dentist clients, and trained for mobile development with flutter.

Worked **part-time** (8hrs) as a software engineer for 6 months managing different mobile and web development projects.

Responsible for a client's subscription flutter mobile app. Focused on client communication and front-end.

Projects

Web Developer
Real-Time Crisis Monitoring System

- Developed front-end components e.g. collapsible sidebar, tabs, based on different conditions.
- Built different pages and layouts with a bit of back-end development in node.js

Web Developer
Dentists' websites

- Responsible for developing php static websites
- Utilized Figma to manipulate images according to client requests.
- Utilized CSS in molding the looks of the websites

Web Developer
Sports Social Platform App

- Utilized flutter framework with BLoC pattern for state management in creating different web components e.g. searchbar with users dropdown, and avatars for selected users.
